

# Turn your phone into a microscope

The Syngenta microscope fits onto your mobile phone camera – enabling you to look deeper into your turf and see what's going on. This tool can help in identifying weeds and diseases as well as aid in checking mower cut quality, root health and spray patterns.

All of this will ultimately assist you in improving turf quality and health.

# To receive your free Syngenta microscope kit:

Simply purchase either one of Syngenta's leading contact or systemic fungicides.

**Medallion**<sup>®</sup>  
Turf fungicide

The curative contact fungicide. Explosive technology that explodes fungi spores on impact.

OR

**Heritage<sup>®</sup>Maxx**  
Turf fungicide

Build your fungicide preventative program around HERITAGE MAXX. The Group 11 fungicide that fights disease inside of the plant.

Please contact your Syngenta Agent or Dealer and register with them for your FREE Microscope. Available whilst stocks last.

## Share your pics

Turn your phone into a microscope and share your photos with colleagues using the hashtag **#ANZturfpics** or send your images to **greencast.au@syngenta.com** and we will upload the best onto our website and credit you with the photo.

## #ANZturfpics

Learning from each other helps to deliver better results.

Therefore the best examples of Diseases, Pests and Weeds from your images will be added to our target pages on Greencast!
