

Fast stopping power combined with long lasting control

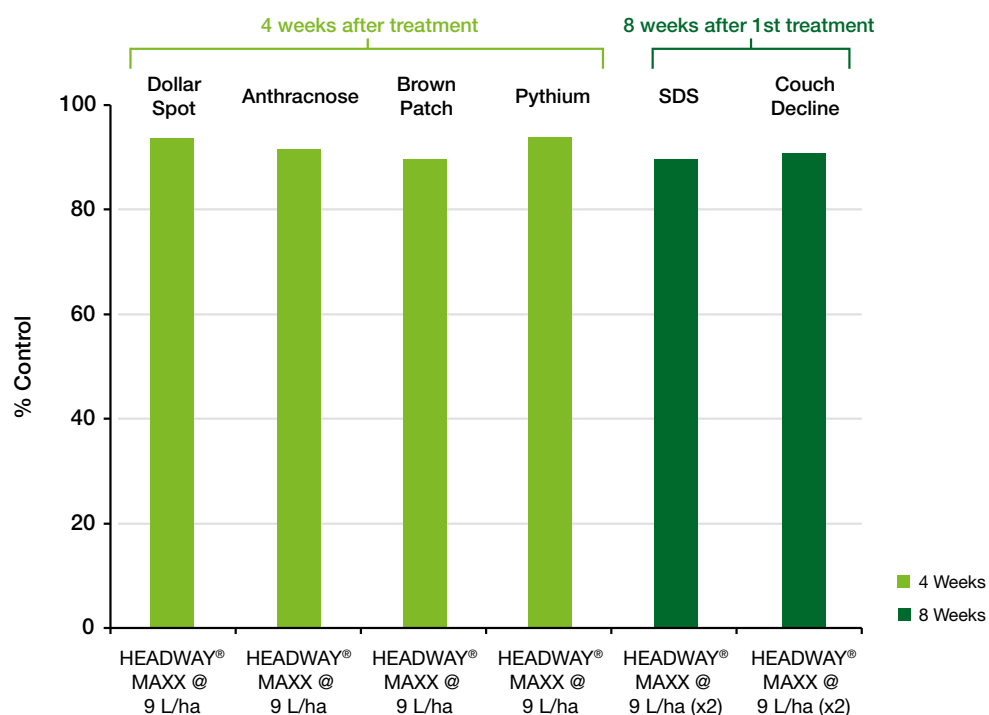

syngenta®

HEADWAY® MAXX Turf Fungicide combines two actives – one providing strength and longevity and the other speed and early curative action. Once absorbed by the leaf, it moves up through the plant and is redistributed to protect new leaf growth. In addition, it's also absorbed through the roots making it effective against root diseases like Pythium and Take-all Patch.

What HEADWAY® MAXX offers you:

- Control and prevention of a broad spectrum of turf diseases including Dollar Spot, Pythium, Anthracnose, Brown Patch and Take-all Patch
- MAXX technology that ensures excellent tank mix compatibility with other fungicides, foliar fertilisers and PRIMO® MAXX
- A low odour, non-staining formulation

SpraySURE | Accuracy and Performance

To achieve great results, accurate application is important.

Target		Syngenta Nozzle	Optimal Water Rate	Optimal Pressure Range
Leaf and crown	F	XC 04 or XC 025	300 to 500 L/ha	2 to 4 bar
Root and soil	So	XC 08	~1000 L/ha	2 to 4 bar

HEADWAY® MAXX is equally effective when used as part of an early curative solution or as a longer term preventative plan.

Example: High disease pressure, conducive weather conditions combined with high golf traffic and holidays are the reality for greens over the Christmas period. Plan a season long preventative program and incorporate two consecutive applications of HEADWAY® MAXX @ 9 L/ha – the first around mid-November and the second 28 days later around mid-December. In this way greens are fully protected during this high risk period.

Target Diseases	Rate	SpraySure
Anthracnose, Brown Patch, Dollar Spot, Leaf Spot, Powdery Mildew, Pythium Leaf Blight, Red Thread, Rust, Winter Fusarium, Yellow Patch	9 L/ha	F
Pythium Root Rot, Seedling Damping Off, Spring Dead Spot, Take-all Patch	9 L/ha	So

Refer to the registered label for full details and instructions for use. **F** = Foliar applied **So** = Soil applied **Su** = Surfactant required

Active Ingredient

HEADWAY® MAXX contains 62 g/L azoxystrobin, a member of the strobilurin fungicides and 104 g/L propiconazole, a member of the demethylation inhibitor fungicides

GROUP **3 | 11** FUNGICIDE

Formulation and Packaging

5 L pack size

A micro emulsion concentrate (ME) with minimal odour as the product does not contain petroleum solvents.

HEADWAY® MAXX mixes completely with water and may be tank mixed with many commonly used fungicides and liquid fertilisers.

HEADWAY® MAXX can be tank mixed with PRIMO® MAXX.
